

PIPIT LUSIANAWATI

Water Infrastructure & Hydraulic Engineering Fresh Graduate (Cum Laude)

+62 859 180 375 633 | pipitcollege@gmail.com | linkedin.com/in/pipit-lusianawati

Civil Infrastructure Engineering graduate from Institut Teknologi Sepuluh Nopember, specializing in waterworks construction engineering, hydraulic engineering, and surveying & mapping. Experienced in hydrology, drainage, hydraulic analysis, and field surveying through internships and engineering projects. Proficient in engineering analysis, geospatial mapping, and surveying equipment, with strong analytical and problem-solving skills.

EDUCATION

Bachelor of Civil Infrastructure Engineering

2022 – August 2026

Institut Teknologi Sepuluh Nopember (ITS) | Surabaya, Indonesia

Specialization: Waterworks Construction Engineering

GPA: 3.65 / 4.00 (Cum Laude)

Related Courses: Hydrology & Hydraulic Engineering, Spillway & Hydraulic Analysis, Irrigation Planning, Drainage & Flood Control, Surveying & Mapping, Geotechnical Engineering, Project Planning and Scheduling, Research Methodology

INTERNSHIP EXPERIENCE

Intern – Supervision Consultant

July 2025 – November 2025

Cabean Dam Project | Indonesia

- Assisted in project progress monitoring and field inspection activities
- Conducted quality control inspections on construction works
- Prepared monthly project reports
- Assisted with drone-based site monitoring and documentation
- Performed field testing, including water pressure tests and soil/geotechnical tests
- Evaluated construction material quality through on-site testing

PROJECT EXPERIENCE

Freelance Engineering Projects

Hydrology and Hydraulics Study – Bekasi–Cawang–Kampung Melayu Toll Road

2023

- Calculated design discharge using the Rational Method, modeled box culvert performance, and prepared a project progress presentation

Report Team – SID Irrigation Land Optimization, Madura

2025

- Prepared technical documentation and planning reports for an irrigation land optimization project

Drainage Design Study – Wisma Titan Employee Housing Complex KM.4

2025

- Conducted hydraulic analysis for the proposed housing complex drainage system

Drainage Design Study – Padel Court, Medan

2025

- Performed hydraulic calculations and drainage system design for the sports facility

Drainage Design Study – TMC Magelang Hospital

2026

- Performed hydraulic calculations and drainage system design for the hospital site

Final Project

Hydraulic Study of Alternative Spillway Designs at Cabean Dam, Blora Regency

2026

- Conducted flood routing and evaluated labyrinth and morning glory spillway alternatives through theoretical, empirical, and numerical analysis using ANSYS Fluent

CORE COMPETENCIES

Engineering & Technical Skills

- 2D AutoCAD & Autodesk Revit
- 3D SketchUp
- ArcGIS, Global Mapper, & Google Earth Pro

- Geostudio
- ANSYS Fluent
- HEC-RAS (Hydraulic & Flood Analysis)
- MS Project (Scheduling)
- Microsoft Office (Word, Excel, PowerPoint)
- Drone Operation & Site Documentation

Personal & Leadership Skills

- Leadership & Team Management
- Scientific & Technical Writing
- Event Planning & Coordination
- Public Speaking & Moderation

ORGANIZATIONAL & COMMITTEE EXPERIENCE

Staff of Event – Bridge Construction Competition Division

2023

D'Village 12th Edition | Surabaya, Indonesia

- Created competition concepts and developed timelines and competition guidelines
- Acted as moderator during the competition

Head of Media Department

2024

Ikatan Mahasiswa Magetan di Surabaya | Surabaya, Indonesia

- Controlled and oversaw the performance of media staff members
- Coordinated and managed the organization's social media content plan

Head of Bridge Construction Competition Division

2024

D'Village 13th Edition | Surabaya, Indonesia

- Led and provided direction for the division, managing team and division resources

Head of Basic Research Division

2024

Himpunan Mahasiswa Diploma Sipil (HMDS) | Surabaya, Indonesia

- Led division operations and monitored and evaluated the performance of basic research staff
- Managed team resources and coordinated research activities

Staff of Relationship Division

2024

Trainer Keilmiah ITS | Surabaya, Indonesia

- Maintained institutional partnerships and communications

TRAINING & PARTICIPATION

- Scientific Speaker at PKTI-TD 2024 – delivered a scientific presentation on engineering-related topics to an academic audience
- Master of Ceremony at PEKIL by Trainer Keilmiah ITS 2024 – facilitated and managed the flow of the event to ensure smooth coordination
- Training for Trainer Batch 13 by Trainer Keilmiah ITS 2024 – completed intensive training focused on public speaking and knowledge delivery skills
- Participant – Civil National Expo Water Engineering Competition 2024 – competed in a national-level water engineering competition involving technical problem-solving
- Participant – Indonesian Water Structures Competition (Kompetisi Bangunan Air Indonesia) 2024 – engaged in a competition focusing on water infrastructure design and analysis
- Participant – Essay Competition by DISCO UNDIP 2025 – developed and submitted an analytical essay on engineering or societal issues
- Participant – Paper Competition by CREATION UGM 2025 – prepared a scientific paper addressing engineering challenges and innovations

ACHIEVEMENTS & AWARDS

- 1st Winner – Essay Competition, ICEF IPB 2024 – achieved first place among national participants through outstanding analytical writing and ideas
- Best Paper – Call for Paper Competition, UPNVJ 2023 – recognized for producing the best scientific paper based on originality and research quality
- Finalist – Bridge Competition, Civil Expo UKP 2023 – selected as a finalist in a structural engineering competition focused on bridge design
- Finalist – Essay Competition, INVERS Universitas Udayana 2025 – reached the final stage by presenting a strong and competitive essay submission
